Selected Websites

Access
- http://www.wsp.org/english/access/intro.html
- http://www.ssrw.org/english/access/intro.html

A n e-mail newsletter for the Water and Sanitation Program (WSP) community. The WSP is an international partnership of the world's leading development agencies concerned with water and sanitation services for the poor.

ASEAN Review of Biodiversity and Environmental Conservation

A web-journal, dedicated to the study of Southeast Asian biodiversity.

Aquaculture Health Page

The objective of the Center for Fisheries Enhancement at Mote Marine Laboratory, Florida, is to increase knowledge on how to preserve and responsibly enhance marine and estuarine fish populations, and to advance marine aquaculture in an environmentally sustainable manner. Three main areas of concern are; hatchery releases, habitat protection and fishing regulations.

The Commonwealth of Learning (COL)
- http://www.col.org/

C O L is an intergovernmental organization created by Commonwealth Heads of Government to encourage the development and sharing of open learning/distance education knowledge, resources and technologies. C O L aims to help developing nations improve access to quality education and training.

Convention on Biological Diversity
- http://www.cbd.int

http://www.biodiv.org/default.aspx

The Convention on Biological Diversity (CBD) is an international treaty aimed at conserving the Earth's biological diversity, ensuring that its use is equitable to all and benefiting all people. The Convention is designed to achieve its goal of a diverse world where all species are protected as part of an ecological system that can evolve and provide its benefits to the planet as a whole.

Danish Institute for Fisheries Research (DIFRES)
- http://www.difu.min.dk/uk/difres_fr.htm

DIFRES carries out research, investigations and provides advice concerning sustainable exploitation of marine life and fresh water resources. It deals with chain considerations
from water to table. This includes interaction between the water environment and productivity and variation of the fish stocks, methods for assessment of the sizes of fish stocks, development of methods for sustainable fisheries management, and stock enhancement.

**Danish Network for Fisheries and Aquaculture Research**
http://www.aqua.net/dk/home/index.html
A network of Danish fisheries and aquaculture scientists. It coordinates the activities within five research networks: Fisheries and Aquaculture Management and Economics FAME, Fish Physiology, Biochemistry and Food (FIBF), Maritime History and Marine Environmental Research School (MARINERS), Sustainable Control of Fish Diseases in Aquaculture (SCO FDA), Fisheries biology and modelling, and Scaling from Individual to Population (SLIP). These networks contain a number of research projects and each network has an associated research school.

**The eSeFDee Marine Sciences Portal**
http://www.desifnet.org/portal/
The eSeFDee Marine Sciences Portal for the North Atlantic and the Mediterranean is the continuation of the former links pages of the SeaFish (CLF-SFD, Ostend, Belgium). The portal site is offered as a free service to the marine scientific community, to managers and decision makers, and in general, to anyone interested in the North Atlantic and the Mediterranean.

**The Fish Nutrition Research Lab**
http://www.uoguelph.ca/fishnutrition/index.html
The Fish Nutrition Research Lab of the University of Guelph conducts basic and applied research in the field of fish nutrition and feeding with particular emphasis on bioenergetics, digestibility, nutrient requirements, feed formulation/evaluation, feeding systems and waste management.

**Fishdiseases.net**
http://www.fishdiseases.net/
A web community for aquatic animal health professionals. It provides links to user directory, upcoming conferences, aquatic disease related professional societies, journals or other publications, university or similar courses, and jobs.

**Improved Assessments and Management of Shrimp Stocks Could Benefit Sea Turtle Populations, Shrimp Stocks and Shrimp Fisheries**
http://www.seaturtle.org/mtn/archives/mtn100/mtn100p22.shtml
An article by C.W. Caillouet, Jr., extracted from Marine Turtle Newsletter, 100: 22-27, 2003. The focus of this paper is on over-fishing and the apparent flaws in shrimp stock assessments that have contributed to it.

**The Institute of Aquaculture**
http://www.aqua.stir.ac.uk/index.htm
An international research and post-graduate training centre, core-funded by the University of Stirling. It also receives research and project funding from the Department for International Development, the European Commission and from a wide variety of national and international research organizations, foundations and trusts and industry. The Institute has links with many other academic institutions, not only in Europe, but also with the Asian Institute of Technology and the Aquatic Animal Health Research Institute, Bangkok, Thailand, the Bangladesh Agricultural University, Mymensingh, the College of Fisheries, Mangalore, India, the Centre for Aquaculture and Environmental Management in Mexico and Myazaki University, Japan.

**Integrated Water-Resources Management in a River-Basin Context**
http://www.wri.org/gpubs/Proceedings/Malang/index.htm
Proceedings of the regional workshop held in Malang, Indonesia, 15-19 January, 2001. It consists of the following:
Part 1: Five-Country Regional Study-Framework and Comparative Analysis
Part 2: Five-Country Regional Study-Country Cases
Part 5: Summary

**The Japan Sea-Farming Association**
http://www.jsfa.or.jp/english/en_index.html
The association is an alliance of the country’s 39 prefectures having seacoast areas within their borders, and their respective fishery cooperative associations. It is a national-level organization for sea farming.

**Journal of Health and Population in Developing Countries**
http://www.jhpdc.unc.edu/
A semi-annual publication of the School of Public Health, Department of Health Policy and Administration, University of North Carolina. It is an interdisciplinary journal devoted to policy and management issues in health and population fields in developing countries.

**Malaysia Nature Society (MNS)**
http://www.mns.org.my/
Established in 1940, the MNS is the oldest scientific and non-government organization in Malaysia dedicated to nature conservation. It aims to promote the study, appreciation, conservation and protection of Malaysia’s Natural Heritage, focusing on biological diversity and sustainable development.

**Marine Parasitic Crustacea CD-ROM**
http://www.malaby.cjparasite/
This CD-ROM utilizes the latest in multimedia technology. The focus is on the biology of representative parasitic crustaceans of invertebrates and fish of coastal marine waters of British Columbia, Canada, including the parasitic Copepoda, Cirripedia, Isopoda and Amphipoda.

**PovertyNet Newsletter**
http://www.worldbank.org/poverty/news/ A monthly newsletter that contains updates on new information and resources available on the PovertyNet web site, covering poverty reduction strategies, the World Bank’s World Development Report (W DR) on poverty and development, poverty monitoring and evaluation, the impact of growth and inequality on poverty, the role of human capital development in the fight against poverty, safety nets and social capital.

**Resource Utilization**
http://www.earthisland.org/map/frtn.htm
The website of the Mangrove Action Project (MAP). It contains articles on earth resources, resource management, and other news and updates.

**The Sea Fish Industry Authority (Seafish)**
http://www.seafish.org/index.asp
Seafish works across all sectors of the UK seafood industry to promote good quality, sustainable seafood. Their research and projects are aimed at raising standards, improving efficiency and ensuring that the industry develops in a viable way.

**Seaweed Site**
http://seaweed.ucmp.berkeley.edu/default0mondy.html
This website has a lot of information on all aspects of seaweed and marine algal biology.

**Smithsonian Institution Marine Science**
http://www.si.edu/marineScience/
Marine Science at the Smithsonian Institution is uniquely positioned to study the patterns and mechanisms of change in ocean environments and is a major force in the effort to conserve key coastal resources. It operates a unique network of coastal laboratories and long-term marine research sites in the western Atlantic Ocean that extends along the east coast of North and Central America, bridging the Panamanian isthmus from the Caribbean Sea to the Pacific Ocean.

**The Stock Enhancement and Sea Ranching Homepage**
http://www.efan.no/was/
The website aims to increase awareness about stock enhancement and sea ranching by highlighting programs and groups that are working in this field, focusing on various successes around the world, pointing to networks of researchers and focus groups, informing about symposia, meetings, and publications in the field, and providing a discussion forum on all aspects of hatchery releases into aquatic environments.

**Voices of the Poor Reports**
http://www.worldbank.org/poverty/voices/reports.htm
Voices of the Poor consist of three books, which bring together the experiences of over 60,000 poor women and men. The first book, Can Anyone Hear Us?, gathers the voices of over 40,000 poor women and men in 50 countries from the World Bank’s participatory poverty assessments; the second book, Crying Out for Change, draws material from a new 23 country comparative study. The final book, From Many Lands, offers regional patterns and country case studies.
Guidelines for Authors

The purpose of these guidelines is to assist NAGA contributors in the preparation of articles for submission to NAGA, WorldFish Center Quarterly. The presentation of your manuscript is the critical first stage in the successful publication of your article and the instructions below will assist you in ensuring that your article is reviewed and published as efficiently as possible.

If you can prepare your article on a computer it will enable us to work more quickly and easily. However, if you do not have access to a computer, hard copies of your manuscript should be submitted to: The Editor, NAGA, Communications Unit, WorldFish Center, PO Box 500 GPO, 10670 Penang, Malaysia.

E-mail: naga@cgiar.org

Manuscript

Please ensure that the manuscript is clear enough to work on, and adheres to the following:

• Paper size: A4
• Font size: 12 points
• Your text should be double-spaced with a 2.5 cm margin all around.
• Your manuscript must be paginated.
• Articles submitted should be between 1500-2000 words.
• Include an abstract in approximately 50 words.
• Articles submitted should be between 1500-2000 words.
• Your manuscript must be paginated.
• Articles submitted should be between 1500-2000 words.
• Your manuscript must be paginated.
• Articles submitted should be between 1500-2000 words.
• Your manuscript must be paginated.

Submit one hard copy; and one soft copy and keep one copy for reference.

The electronic/soft copy should be in Microsoft Word for Windows. The soft copy must be an exact printout of the hard copy. The soft copy should be sent by e-mail to: naga@cgiar.org. If you do not have access to e-mail, send the soft copy in a 3 ½ inch disk to the WorldFish Center.

The hard copy should only be printed on one side and sent to WorldFish.

House style

• Spelling should conform to the new edition of the Concise Oxford Dictionary. Alternatives will be accepted if provided they are consistent.
• Use Italic for scientific names, and words/phrases in foreign languages.
• To check all fish species names, refer to FishBase at www.fishbase.org.
• Justification of text – the text should be left justified. Do not use hyphenation except for hyphenated words.

Headings

• where there are several levels of heading, each one should be differentiated from the other as below:
• Title of article – (Upper and Lower Case, Bold, 14 pts, Centered)
• Heading – Level One (Upper and Lower Case, Bold, 12 pts, Centered)
• Heading – Level Two (Upper and Lower Case, Bold, 11 pts, Flush Left)
• Heading – Level Three (Upper and Lower Case, Bold, 10 pts, Flush Left)
• Heading – Level Four (Upper and Lower Case, Italics, 10 pts, Flush Left)

• Space after punctuation marks – use single (not double) space after full stops, commas, colons, semicolons, etc.

• Quotation marks – use double quotation marks for dialogue and quoted material. Single quotation marks are used only for quote within quotes.

• Units of measure – The International System of Units (SI) for measurements and weights is recommended.

• Numerals – spell out numerals smaller than 10, e.g. eight fish. However numerals smaller than 10 should not be spelled out when accompanied by a standard unit of measure, e.g. 3 kg.

• Dates – should be written as ‘day month year’, e.g. 8 May 2001.

• Abbreviations – Any word or words to be abbreviated should be written in full when first mentioned followed by the abbreviation in parenthesis.

• Illustrations
• Illustrations can be photographs, line drawings, maps or graphs. Bear in mind that the quality of printed illustrations is dictated by the quality of the originals you supply;
• Line drawings submitted should be originals, drawn in black ink on white paper. These should be mailed to the WorldFish Center flat or rolled, never folded;
• If drawings are digitally produced, they must be of high quality;
• One color (black) line drawing should be produced at 500-800 dpi and saved as a bitmap tiff file;
• Tone illustrations or illustrations in color should be produced at 250-300 dpi and saved in grayscale as tiff files.
• Maps should include indicators of latitude and longitude.
• Check to ensure that figures are numbered correctly as they are cited in the text. Position figure numbers and headings at the bottom of the illustration.

• Tables
• Key in your tables using the Table Menu in Word.
• Ensure that your tables are numbered correctly and that they tally with the numbering cited in your text.
• Position table numbers and headings above the table. The headings should be clear, complete and informative.
• Place sources and notes immediately below the table.
