

## A QUICK GUIDE TO THE PROPOSAL DATABASE

### Main Page

### Notes:

#### SEARCH CRITERIA

- (1) Unique key words related to the proposal. Example - if you type 'aquaculture' - a long list of proposals on aquaculture will appear
- (2) Refers to a period - example will be 01 Jan 2006 to 31 Dec 2006 (01/01/2006 to 31/12/2006)
- (3) Select from a drop down list of **Investors**
- (4) Select from a drop-down list of **Staff**
- (5) Select **Status** from the drop-down list: Secured, Submitted, Expected, Under Development
- (6) Select the **Region** or **Discipline** from the drop-down list

After using the Search Filters, you will get a list of the proposals matching your search criteria like the below:

Proposal List

65 proposals found. Filtered by: [Search again]

Portfolio/ Discipline	Investor	Proposal Code - Title	Project Leader	Total Expected	Status	Target Date	Priority	Full Proposal

**WorldFish Proposal**

**116CWFESE**

**Proposal Title** : Valuing the Role of Living Aquatic Resources in Rural Livelihoods in Wetlands Areas of China

**Portfolio/Discipline** : ESEA **Status** : Secured

**Total Expected (USD)** : 355,000 **Submitted Date** : 18-Jun-2007

**Summary** : **Duration (months)** : 24

Researchers involved in this proposed project aim to enhance the livelihoods of poor communities of the Upper Mekong and Yellow River Basins. They will identify and promote effective processes of aquatic resource governance that reflect the value of living aquatic resources to multiple stakeholders in wetland agro-ecosystems. Living aquatic resources in wetlands are often undervalued in water productivity assessments to the detriment of local populations that depend on them. Based on case studies of two major Chinese wetlands areas with different ecosystems, socio-economic and political characteristics, this project will assess the value of aquatic production to different stakeholders—especially marginal groups—over two complete seasonal cycles. Researchers propose this evaluation of the full value of water and aquatic systems in order to enable better policy for stakeholder access and work toward more efficient and equitable land and water management policies. Partners include the Center for Integrated Agricultural Development of the China Agricultural University, the Center for Chinese Agricultural Policy of the Chinese Academy of Sciences, and the Freshwater Fishery Research Centre.
