

## The First International Conference and Exhibition on Sustainable Development of Aquaculture

Organized by the Central Laboratory for Aquaculture Research  
in cooperation with WorldFish  
under the auspices of

### His Excellency

Prof. Dr. Abd El-Moneem Al-Bana, Minister of Agriculture & Land Reclamation, Egypt

### Conference Chair

Prof. Dr. Mahmoud Medany, President, Agricultural Research Center in Egypt

### Conference Coordinators

Prof. Dr. Ayman Ammar, Director, Central Laboratory for Aquaculture Research in Egypt

Dr. Gareth Johnstone, Director General, WorldFish

### Grand Nile Tower Hotel, Grand Hayat

Corniche El Nile, Garden City, Cairo, Egypt  
20–22 November 2017

#### Conference sponsors

## About the conference

The First International Conference and Exhibition on Sustainable Development of Aquaculture is organized jointly by WorldFish and the Central Laboratory for Aquaculture Research in Egypt. The aim of the conference is to bring together international stakeholders in the aquaculture industry to discuss solutions to challenges facing the sector in Egypt, and the African continent writ large, by sharing ideas and experiences from around the world. It will bring together policy and decision makers, aquaculture scientists, economists, academics, input providers and farmers, and fish health practitioners, some of whom will give keynote addresses. The conference is being held amid a backdrop of increased opportunities for growth and unprecedented challenges in the sector. Keynote addresses, original research articles and posters will be presented. The conference will also offer space for exhibitors to present innovations, products and services. International participants are encouraged to attend.

## Conference themes

Sustaining aquaculture, seizing opportunities for food security

## Main topics

- Fish farm management with limited resources
- Climate change and its impact on fisheries
- Diversification of species in aquaculture
- Optimizing water resources
- Development of fisheries and fishery resources
- Fish feeds and nutrition
- Fish genetic improvement, capture and biodiversity
- Fish health and bio security
- Modern fish processing technologies and quality control
- Economics of the aquaculture value chain
- Aquaculture system innovations
- Environmental impact assessment in aquaculture

## Registration fees

	Before 15 October	After 15 October
Egyptian participants with a paper or poster	EGP 600	EGP 700
Egyptian participants without paper	EGP 250	EGP 300
