

A MEMBER OF CGIAR

WorldFish is one of the 15 member organizations of CGIAR, a global agriculture research partnership for a food-secure future, and participates in the following CGIAR Research Programs that combine the expertise of many partner organizations:

- Aquatic Agricultural Systems
- Livestock and Fish
- Climate Change, Agriculture and Food Security
- Agriculture for Nutrition and Health
- Policies, Institutions and Markets
- Water, Land and Ecosystems

Member Organizations

- Africa Rice Center
- Bioversity International
- Center for International Forestry Research
- International Center for Tropical Agriculture
- International Center for Agricultural Research in the Dry Areas
- International Crops Research Institute for the Semi-Arid Tropics
- International Food Policy Research Institute
- International Institute of Tropical Agriculture
- International Livestock Research Institute
- International Maize and Wheat Improvement Center
- International Potato Center
- International Rice Research Institute
- International Water Management Institute
- World Agroforestry Centre
- WorldFish

WORK WITH US

At WorldFish, we work with an extensive network of donors and partners to create change for the millions who depend on fish in the developing world. Partnerships are essential to bring technologies and innovations to scale and achieve development impact. By 2025, WorldFish, together with our donors and partners, will improve the lives of 28 million people.

WorldFish partners with an extensive network of international, national, regional and local governmental institutions, universities, private sector organizations and nongovernmental organizations.

Harnessing research that makes a difference

WHO WE ARE

Globally, more than 1 billion people obtain most of their animal protein from fish and approximately 800 million depend on fisheries and aquaculture for their livelihoods. Sustainable, productive fisheries and aquaculture improve food and nutrition security, increase income and improve livelihoods, promote economic growth and protect our environment and natural resources.

WorldFish is an international nonprofit research organization that harnesses the potential of fisheries and aquaculture to reduce hunger and poverty. Utilizing its scientific expertise, its networks and an innovative “research in development” approach, WorldFish increases the productivity and sustainability of fisheries and aquaculture and improves the lives of poor people who rely on them.

Our mission is to reduce poverty and hunger by improving fisheries and aquaculture.

WHERE WE WORK

Since 1975, WorldFish has been recognized as a global expert on fisheries and aquaculture. With more than 40 years of experience working with communities in Africa, Asia and the Pacific, WorldFish is deeply committed to the millions of poor people who rely on fish for food, nutrition and income, and is focused on creating a more food-secure and prosperous future for them.

1 billion poor people obtain most of their animal-source protein from fish.

OUR RESEARCH AREAS

At its core, WorldFish is a scientific research organization. WorldFish uses its technical and scientific expertise in fisheries and aquaculture to promote evidence-based development solutions and policy recommendations that help the millions who are dependent on fish. WorldFish focuses its expertise and research in the following areas:

- Building **adaptive capacity** to climate change in fisheries and aquaculture.
- Strengthening **gender equality** in fish-dependent communities.
- Increasing the benefits to poor people from fisheries and aquaculture **value chains**.
- Improving **nutrition and health** through fisheries and aquaculture.
- Identifying and promoting **policies and practices** to increase the resilience of small-scale fisheries.
- Sustainably increasing the productivity of **small-scale aquaculture**.
