

Solomon Islands Species Forum

Wednesday 4th October

SINU

Recap

© Jan van der Ploeg/WorldFish

Discussions today

- Conservation Status
- Progress in data management and storage
- Sustainable use
- Threats – e.g. logging, invasive species
- Communicating information to communities and governments
- Conservation actions – planning, species recovery, involving communities, traditional knowledge

© Cornelius Qaqara

Key points

- Lots of high quality studies and data generated
- Need for sharing: data, research findings, lessons learned in actions and management
- Engaging communities and making conservation locally relevant
- Challenges remain: invasives, logging, protection of sites and species

Next Steps

- ~Protection of sites
- ~Species recovery plans
- ~Invasive species management
- ~Enforcement of legislation
- ~Continued collaboration, coordination and commitment
- ~Increasing capacity of graduates and next generation scientists and Conservation managers
